

Don't be Afraid of C++-Templates

Mastering C++ Templates is just ...
... understanding what they are ...
... **and** what they are **not**

Dipl.-Ing. Martin Weitzel

*: You may download this presentation from the [Author's Internet Site](#) for any use in compliance with the [Creative Commons BY-SA License](#). As it has been created using the free HTML4-Tool [Remarkdown](#), it is written using the [Markdown-Syntax](#), so you may even enhance the purely electronic form with your own annotations, only by means of any ordinary text editor. Just hit the button for editing this document while viewing this in an internet browser, and follow instructions.

Agenda

This talk is mainly based on

- **Live Demos** and
- **Code Walks**

Therefore no prepared presentation is handed out to the audience

You are welcome to interrupt the speaker with questions and
also propose to try small changes and variations.

Good Bye

A summary of what was done during the last 45 minutes will be made available on the [speaker's web-site](#).^{*}

Thanks for Your Participation!

^{*}: Allow some days to prepare this – the summary will probably be available next week or at the latest.
